ABOUT GLOBAL DISTRIBUTORS

Global Distributors is a growing company with a wide range of imported products like MDF (Whitish/Brown), HMR (Green/Pink), HDHMR, Flexible Plywood (Gurjan/Hardwood), Softboards, PVC/WPC , Rubberwood Fingerjoint Boards, Birch Plywood, Calibrated Plywood (Eucalyptus/Acacia/Matt), Prelam Plywood & similar products.

Our journey started in 2010 with just a few employees and limited products but now we are one of the leading importers and distributors in Mumbai.

OUR MISSION AND VISION

Our mission is to ensure the satisfaction of our employees, suppliers, clients and staff. We want our employees to learn new skills and grow while they are working with us as well as provide business to our suppliers and develop long term relationships.

Our vision is to grow and expand in the foreseeable future by pushing our targets and pursuing them with determination and hard work. We expect to grow in terms of the size of the company as well as the variety of products offered by us.

CHANNEL PARTNERS

MDF INTERIOR

Thickness Range: 1.8mm to 25mm

Why to use MDF:

- Highly Versatile
- Cost - Effective
- Perfect for wide range of applications

BROWN MDF

WHITISH MDF

Applications:

- Laser Cutting
- Toys and handicrafts
- Making Decorative Boxes
- Furniture
- Cabinets

HMR MDF (HIGH MOISTURE RESISTANT)

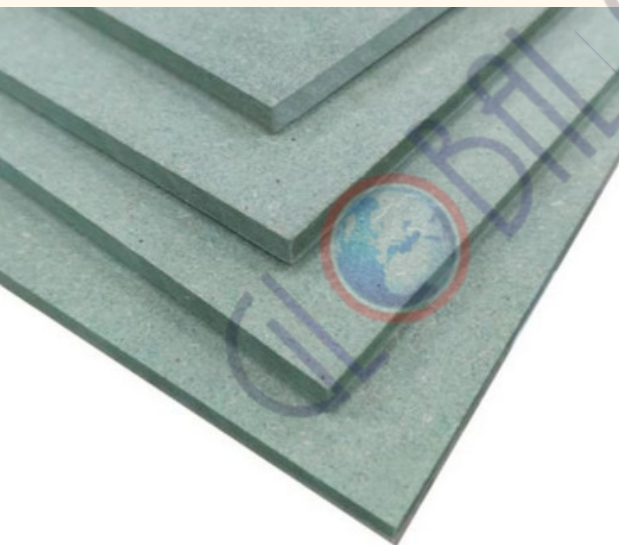

Thickness Range: 2.7mm to 25mm

Why to use HMR:

- High Moisture Resistant (HMR) is specifically designed to provide high moisture resistance, making it suitable for wet or humid environments

HMR PINK

HMR GREEN

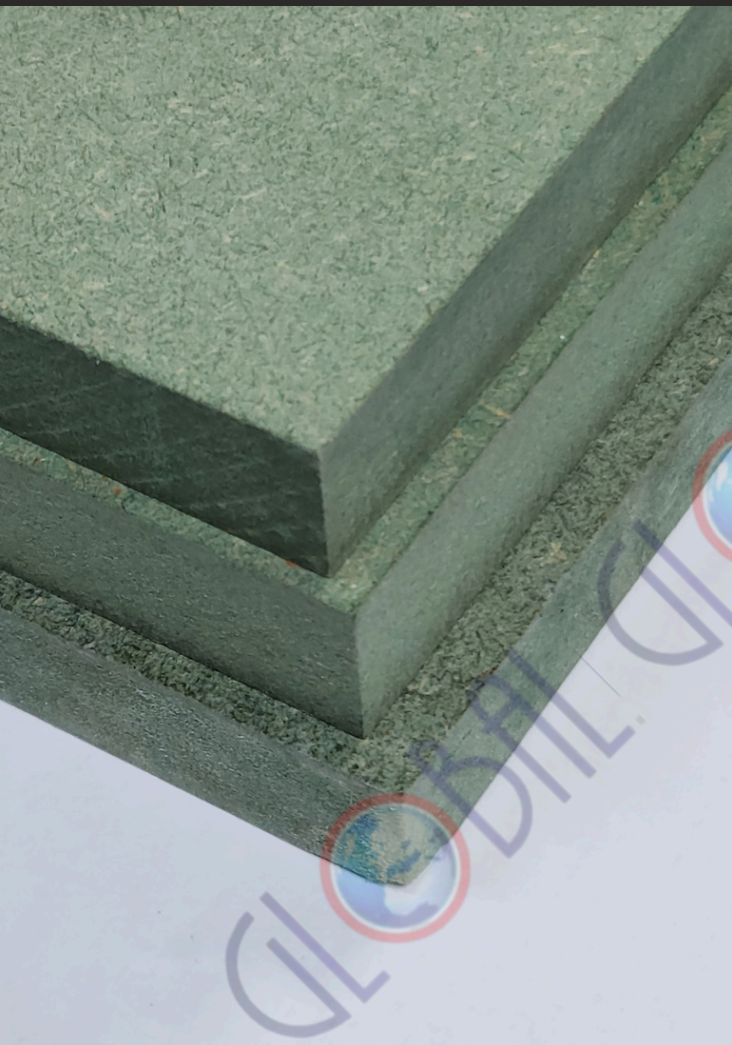

Applications of HMR:

- Kitchen furniture
- Doors & Wardrobes
- Duco Painting
- Furniture Making
- Moulding
- Laser Cutting

HD-HMR

(HIGH DENSITY- HIGH MOISTURE RESISTANT)

Thickness Range: 2.7mm to 25mm

Why HD-HMR is the best choice for you:

- High Density & High Moisture Resistance
- Termite and Borer resistant
- Environment Friendly

Applications of HD-HMR:

- Kitchen Shutters
- Furniture Making
- Outdoor Furniture
- Moulding & Laser Cutting

AVAILABLE FOR DOOR APPLICATION

- **2.7mm - 2150 x 2600**

FLEXIBLE PLYWOOD

GURJAN & HARDWOOD

Thickness Range: 4.6mm to 10mm

Why Flexible Plywood is the best choice for you:

- Easily folded into any shape without chipping, cracking, peeling, or staining
- Light Weight
- High Quality
- Cost - Effective

Applications of Flexible Plywood:

- Interior elements like lamp stands, ornamental and decorative woodwork
- Modern curved chairs
- Rounded or curved columns and arches
- Packing

BIRCH PLYWOOD

Thickness Range: 3mm to 30mm

About Birch Ply:

- A fine-grained wood material with High strength & Durability

Why Birch Plywood is the best choice for you:

- Suitable for CNC Routing & Laser Cutting
- Resistant to warping & bending
- Environment Friendly
- Accepts Paper Back Veneer for more Decorative Projects

CALIBRATED PLYWOOD

Thickness Range: 4mm to 25mm

Why Calibrated Plywood is the best choice for you:

- Zero surface core gap
- Uniform Thickness on all sides.
- Ideal for post-lamination
- Available in BWR & BWP Grade

Applications of Calibrated Plywood:

- Modular Furniture & Kitchens
- Wooden shutters
- Industrial Projects
- Furniture Making

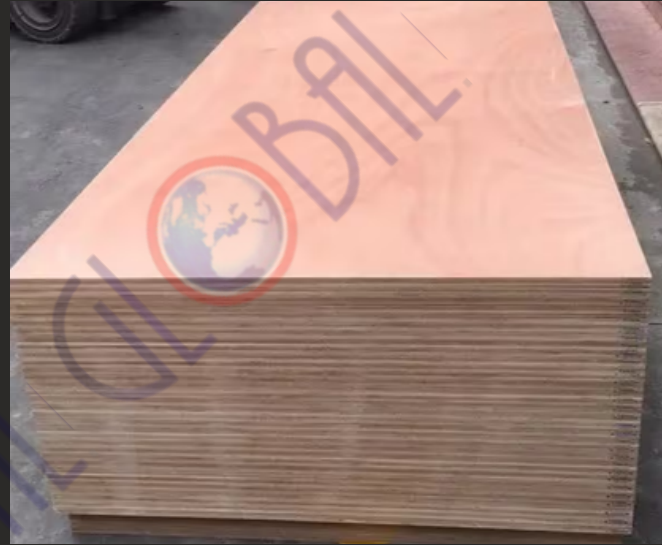

CALIBRATED PLYWOOD
